Forecast For East of England
Issued by Met Office Exeter
at 0400 on Sunday 26 Sep 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Sunny spells developing after a misty start, isolated showers later.

Today:
A rather dull and misty start with some patchy fog, but it should soon brighten up with some sunny spells developing. However, the odd heavy or thundery shower is possible in the afternoon. Feeling warm in the light winds. Maximum temperature 23 deg C (73 deg F).

Tonight:
Any showers soon dying out to leave a mostly dry night with some clear spells. However, thickening cloud will bring outbreaks of rain to the far west by morning. Minimum temperature 9 deg C (48 deg F).

Monday:
Breezy conditions with outbreaks of locally heavy rain will move east during the morning, with sunny spells and the odd shower following from the west. Feeling fresher than of late. Maximum temperature 19 deg C (66 deg F).

Outlook for Tuesday to Thursday:
Showers or longer spells of rain developing Tuesday after a fine and dry start. Wednesday much cooler and windy with rain clearing east later. Thursday probably generally dry and bright.
